
Spring 2024 Newsletter

Baby Anne receives her first dose of vaccines.

Dear Friend,

The ongoing humanitarian crisis has put severe stress on Haiti's health system and made it increasingly difficult for people to access health services. But when patients like Judith and her husband Christ-homme are able to reach St. Boniface Hospital, they find our doors open and our experienced staff ready to serve them.

Judith and Christ-homme came to SBH this spring to bring Anne, their second child, into the world. "I had no doubts about returning to give birth [at SBH] a second time," says Judith. [You can read their family's story here.](#)

In this issue of our newsletter you will also learn about a leap forward in our oxygen production capacity and the arrival of an exciting new imaging device. In partnership with Build Health International, our operations staff overcame every obstacle to install a powerful new oxygen plant that has increased our resilience in the face of supply chain challenges. And with a donated C-arm machine, our orthopedic surgery team can reconstruct broken bones more quickly and with greater precision.

We're fully invested in creating the conditions for a better future, where every person is treated with dignity and there is room to dream. Thank you for joining us in this essential work.

On behalf of the entire team, we are so grateful that you are holding on to hope.

Kenbe fèm,

Oxygen Independence

Our new oxygen plant ensures a steady supply of this essential medicine for our patients.
